PRIMARY SCHOOL DRAWING TASKS

DUNTON HILLS
GARDEN VILLAGE

Calling all young designers! We need you to help us design some areas of Dunton Hills Garden Village. Dunton Hills will be a new village, designed around nature. It will have everything that a village needs including beautiful homes, schools, playgrounds, shops and places for work.

We need your help to imagine exactly what these spaces should look like, who will use them, and how they will be used.

We will then use your ideas to make sure that the future village will be a place that people will want to live in, and that the spaces can be enjoyed by everyone!

In the next pages, we want you to:

1. Pick one (or more) of the spaces that we suggest and design what they would look like.
2. Read the short description and the guiding questions.
3. Think about what these space should have? Who will use them?
What special items would you like us to have there? Be as detailed as you can!
4. Draw these spaces on the blank sheets. You can draw the spaces completely from your imagination or you can use the shapes that we included, to help you. You can cut the shapes, colour them and draw on them to show us exactly what you would like to see.

You will need:

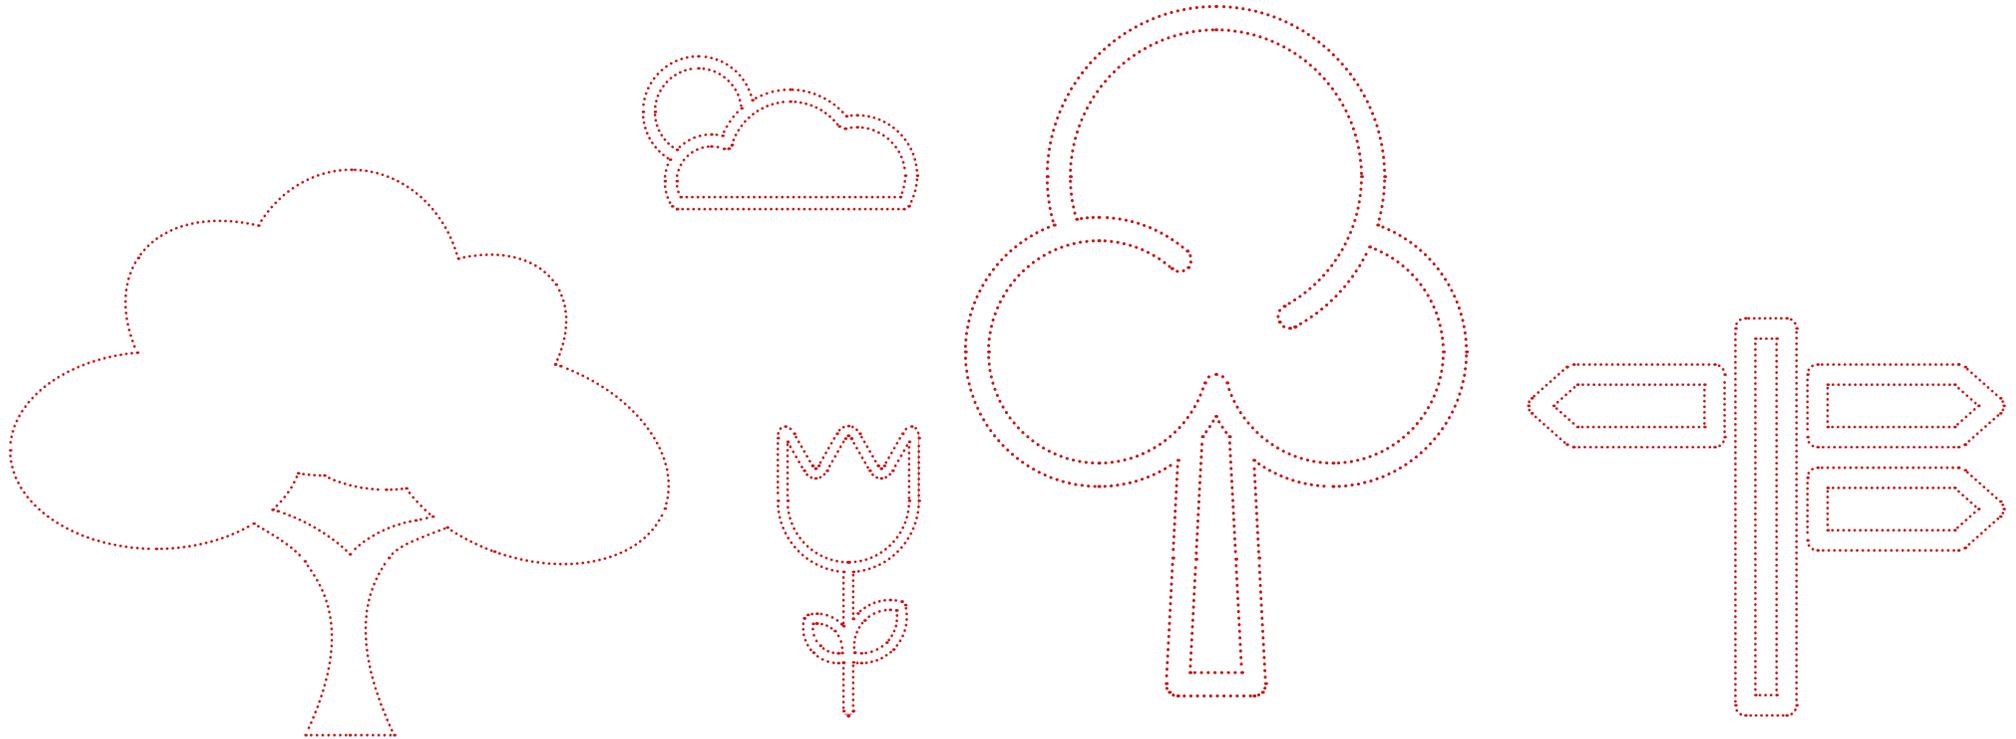

- Pencils, colouring pencils/crayons, paint or any other drawing material that you like;
- Scissors; and
- Glue.

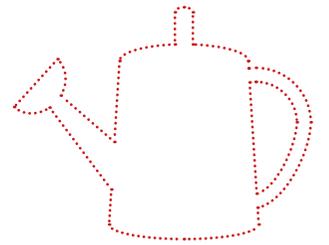

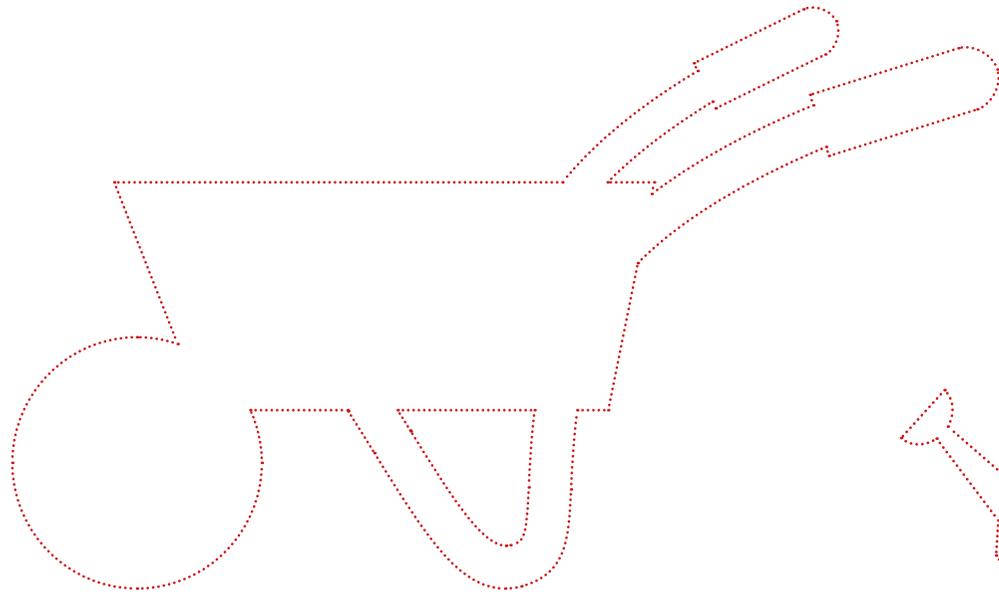

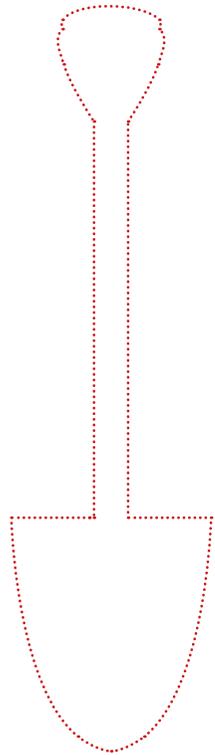

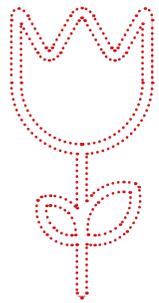

Please submit your photos of your designs to gardenvillagecommunities@brentwood.gov.uk, including your name, age and school, and we will upload them (only with your permission) to the gallery on our website at www.duntonhillsgardenvillage.com

The new village will have spaces for growing food. People will be able to plant their own fruits and vegetables and then either eat them or sell them in a market. The growing space will be a place where people can come together and enjoy gardening.

What do you think the growing spaces should look like? What tools will people need? What kinds of fruits and vegetables would you like to grow? Should we provide sheds? Who do you think would like to grow their own plants?

the growing
spaces should
look like.**

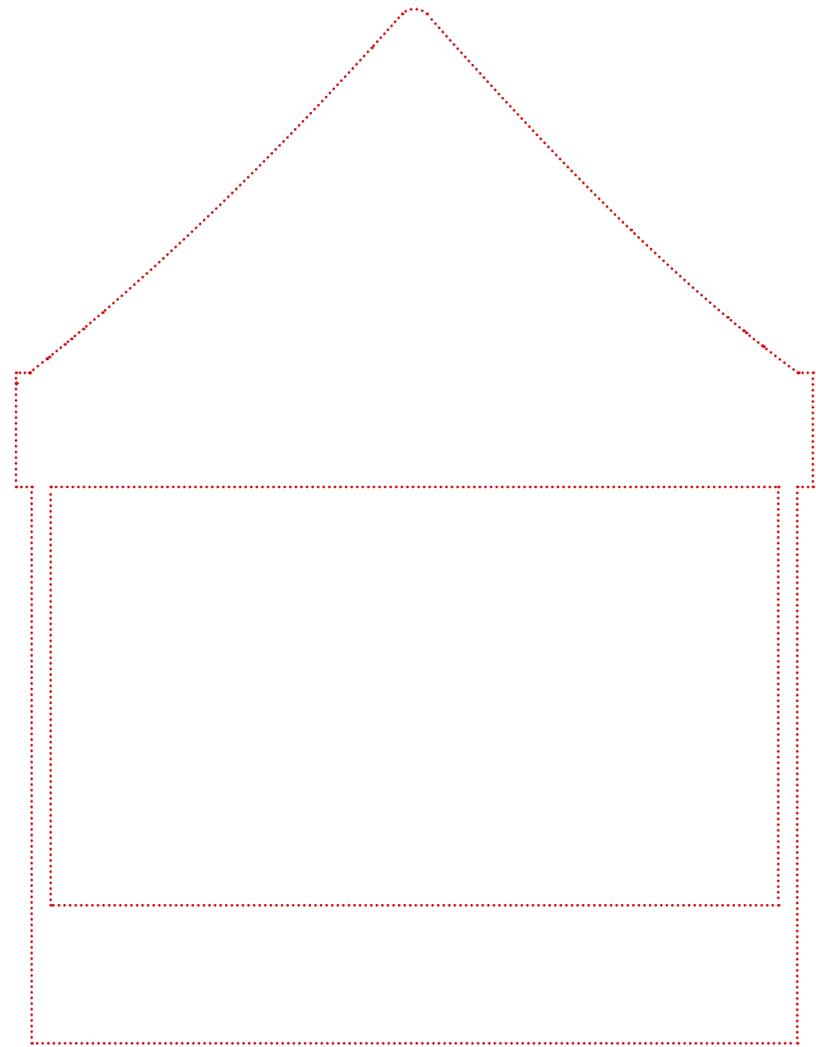

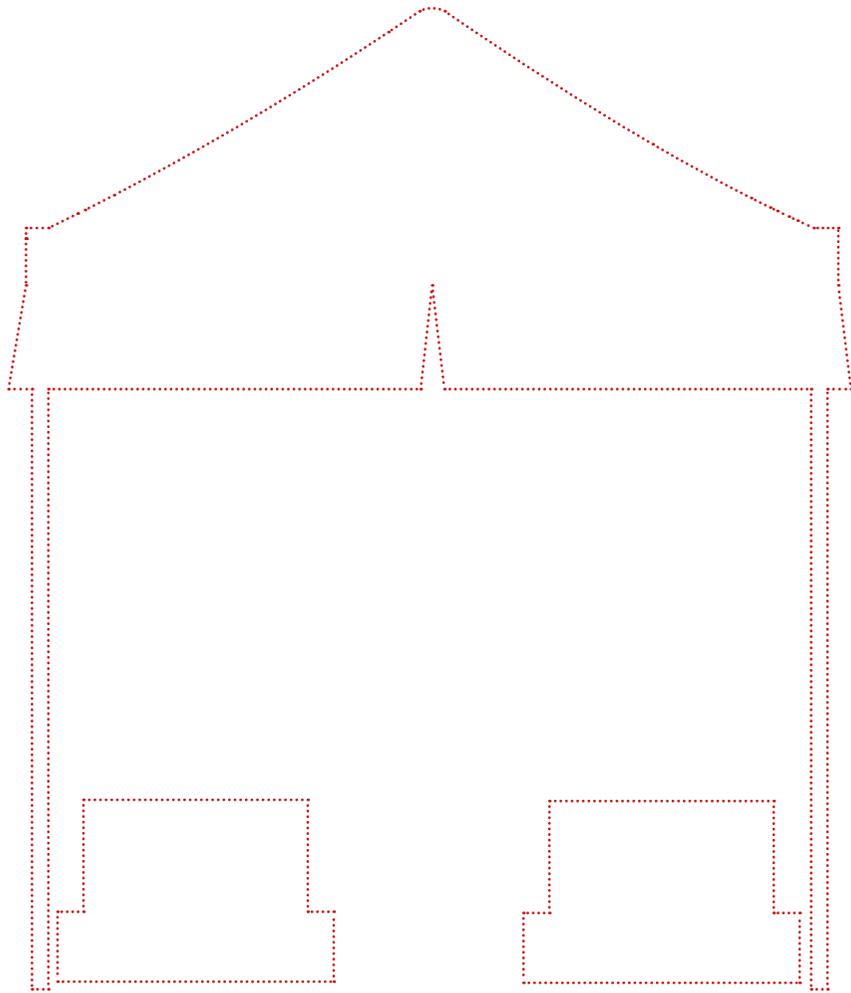

Design your Growing Spaces

The Market Square is an open space in the Village Centre where people will gather. It is a place where outdoor community events can take place. It will have outdoor markets where people can sell all sorts of things, like crafts, fruits and vegetables, flowers and food. People will also be able to host outdoor social events. The space will have room for market stalls, benches and trees.

What would you like to see in the Market Square? What kind of events can be held there? What will the space look like? What kind of trees or plants will be there? Should we include a small water fountain where kids can play in the summer? Who will use the space?

Square should
look like.**

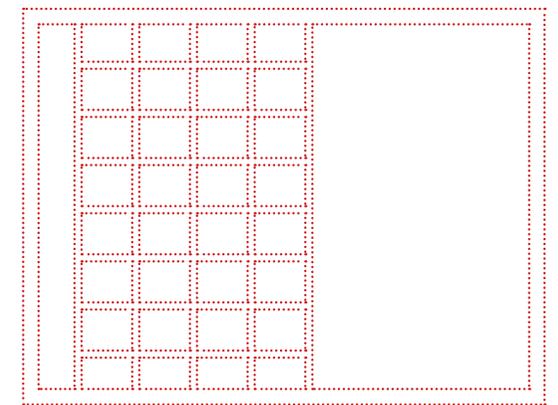

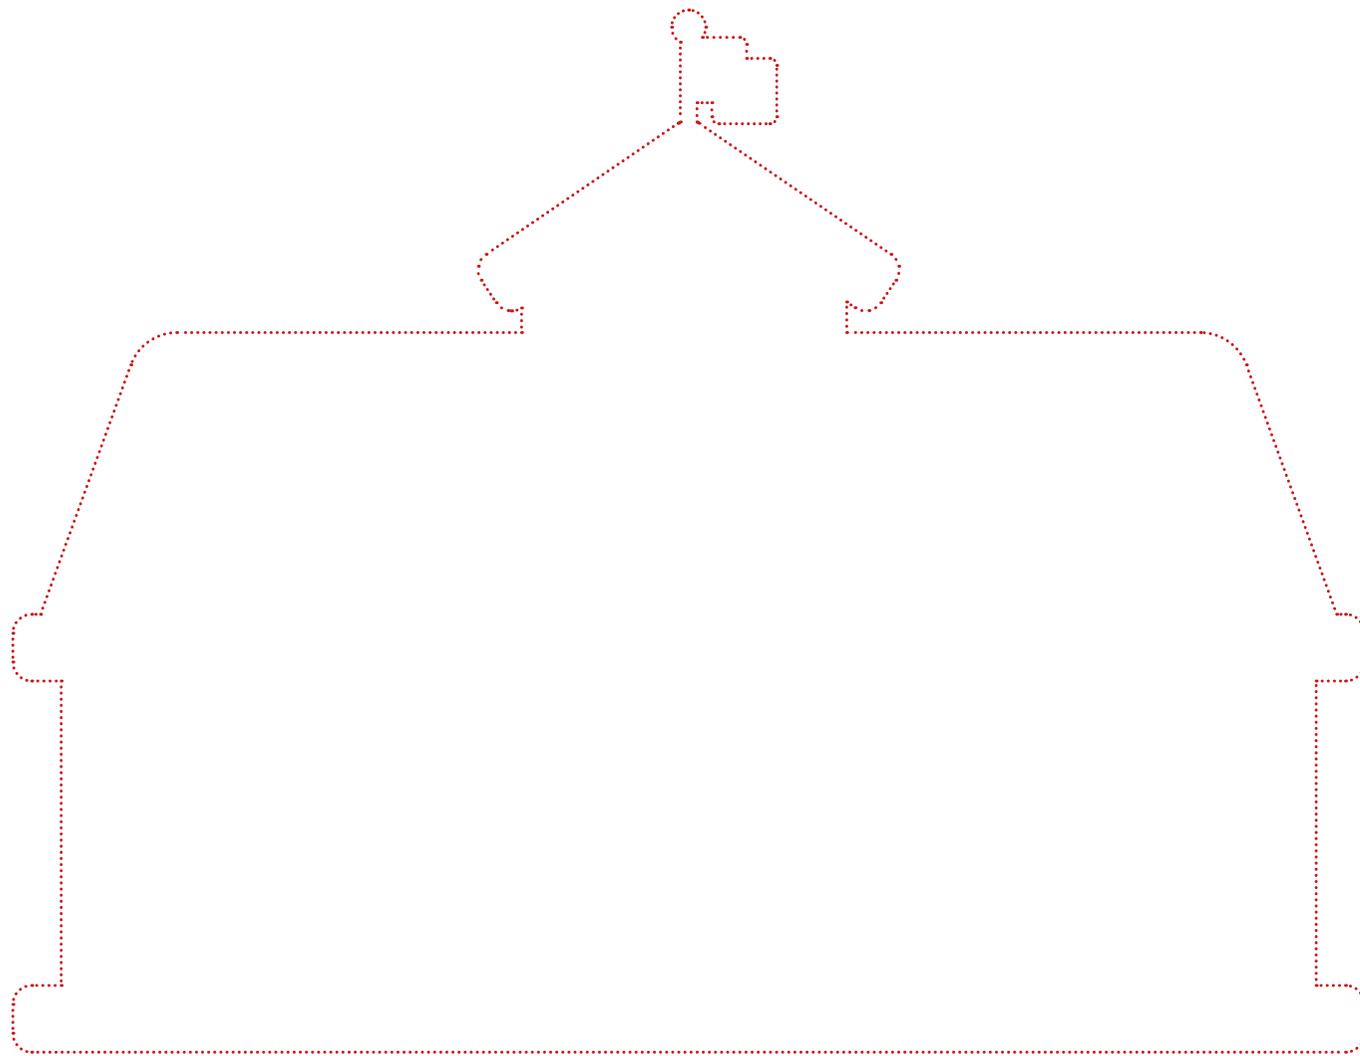

Design your Market Square

The new village will have 3 primary schools, one in each neighbourhood and one secondary schools. It will also have a number of nurseries. The schools will be beautiful spaces that encourage learning!

What do you think we should include in the schools? What kind of spaces? This could mean a certain type of libraries, outdoor performance spaces, or spaces for indoor sports. What kind of outdoor spaces should we include? How can we create a strong connection to nature? Perhaps by including areas for planting or classes in the outdoors?

the schools
should look
like.**

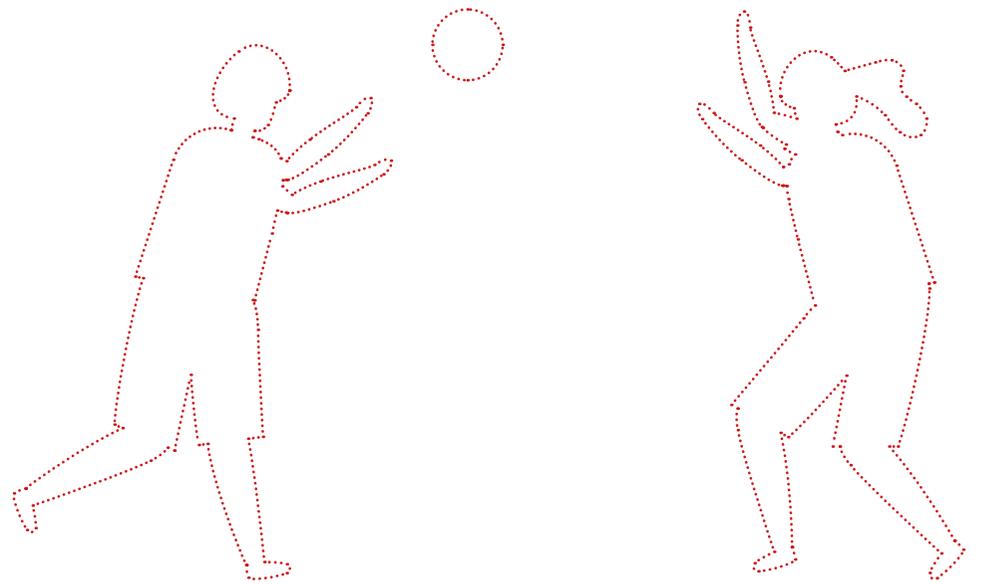

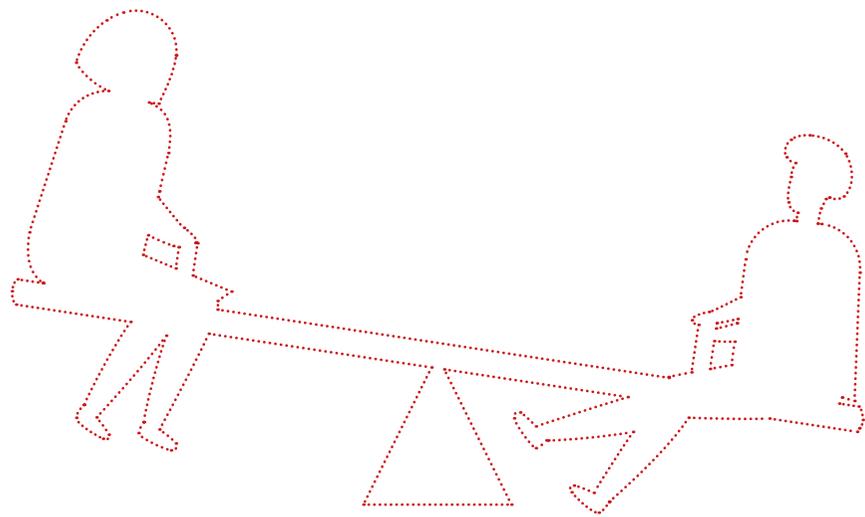

Design your School

Dunton Hills will have a community centre at the village centre. This will be a space that can be used by different members of the community from all age groups. It can be used to hold indoor events, classes on different topics or it can have a small library.

What would you like to see in the community centre? What kind of classes would you or your parents like to attend? What equipment would these classes need? Would you like to see spaces designed specifically for the use of younger people? What would these spaces look like or what would they include?

Streets at Dunton Hills will be designed to encourage people to walk and cycle to school, work and shops. They will have wide footpaths that are well lit at night so that people feel safe to walk. Footpaths will have trees and plants to make them beautiful. They will also have benches for people to rest if they get tired. Streets will also have clear signs to help people easily understand where they are. Streets will have special lanes for cycling so that people can cycle without fearing cars.

Can you imagine what the streets will look like? What should the benches look like? What kind of planting should we include?

People living in the new village will be encouraged to use buses. Bus stops will always be a 5 minute walk away. The bus stops will include benches so that people can rest, a cover to protect them from rain and wind, and a screen to tell people when the buses will arrive.

What else do you think we should include in the bus stops to make them easy to use? What should the seating look like? How can we make sure that all people, with different abilities, can use the bus stops?

Homes at Dunton Hills will be designed to be beautiful and easy to use. Some homes will be designed for one or two people, while other homes will be designed for larger families. Homes will have private open spaces and room for working from home.

We want to make sure that homes can be used by people throughout their life. What do you think we should include so that older people can easily use their homes?
What kind of spaces would you like to see in these homes? Perhaps a place to practice your hobbies, or a space to plant outdoors?

A Forward Thinking Village

Design your homes

the homes at
Dunton Hills
should look
like.**

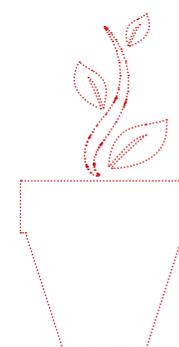

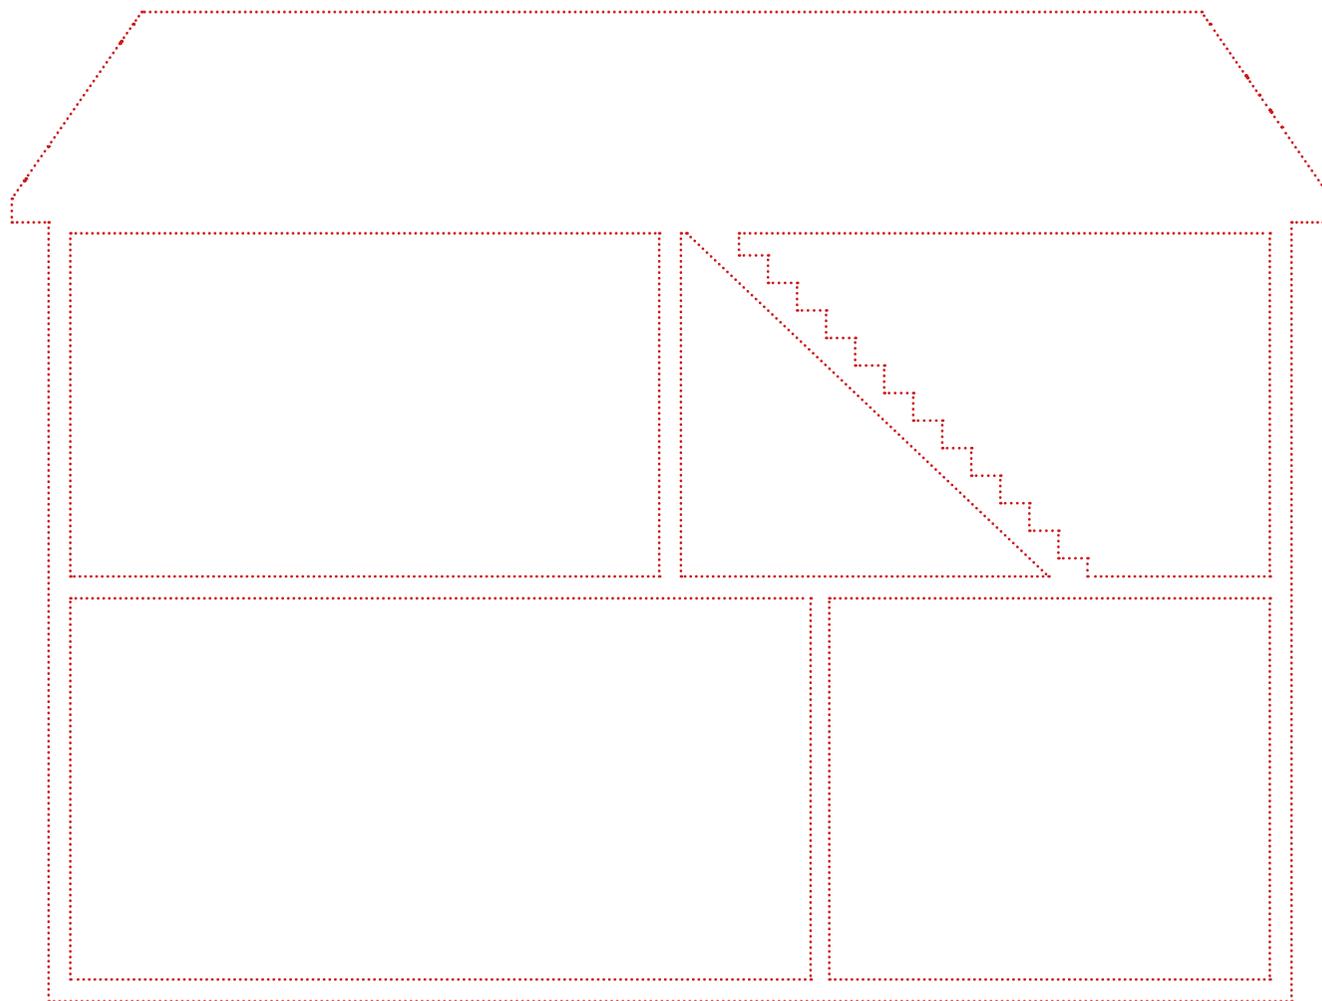

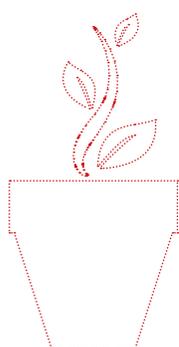

Design your homes

We want homes to be as environmentally friendly as possible. Homes will have windows designed to allow them to easily cool down in the summer. They will also be built in the shade of other buildings or trees to keep them cool during the hot weather. Homes at Dunton Hills will have ways to save energy like solar panels and LED lights.

How do you think we can make homes more environmentally friendly? Maybe we could use recycled materials? What tools should homes have to help people recycle and reduce their waste?

Help us fight climate change

DUNTON HILLS GARDEN VILLAGE

Dunton Hills will have playgrounds at a short walking distance from all homes and schools. Playgrounds will have different play areas for different ages. The playgrounds will have play spaces that are built within nature to help young people connect to the environment.

What kind of play spaces would you like to see in playgrounds? How can we make sure that all young people can play safely? What kind of planting would you like to see in the playgrounds? What special elements would you like to see? What kind of activities would help young people connect to nature? Maybe they could explore an insect hotel or have special areas for planting?

playgrounds
should look
like.**

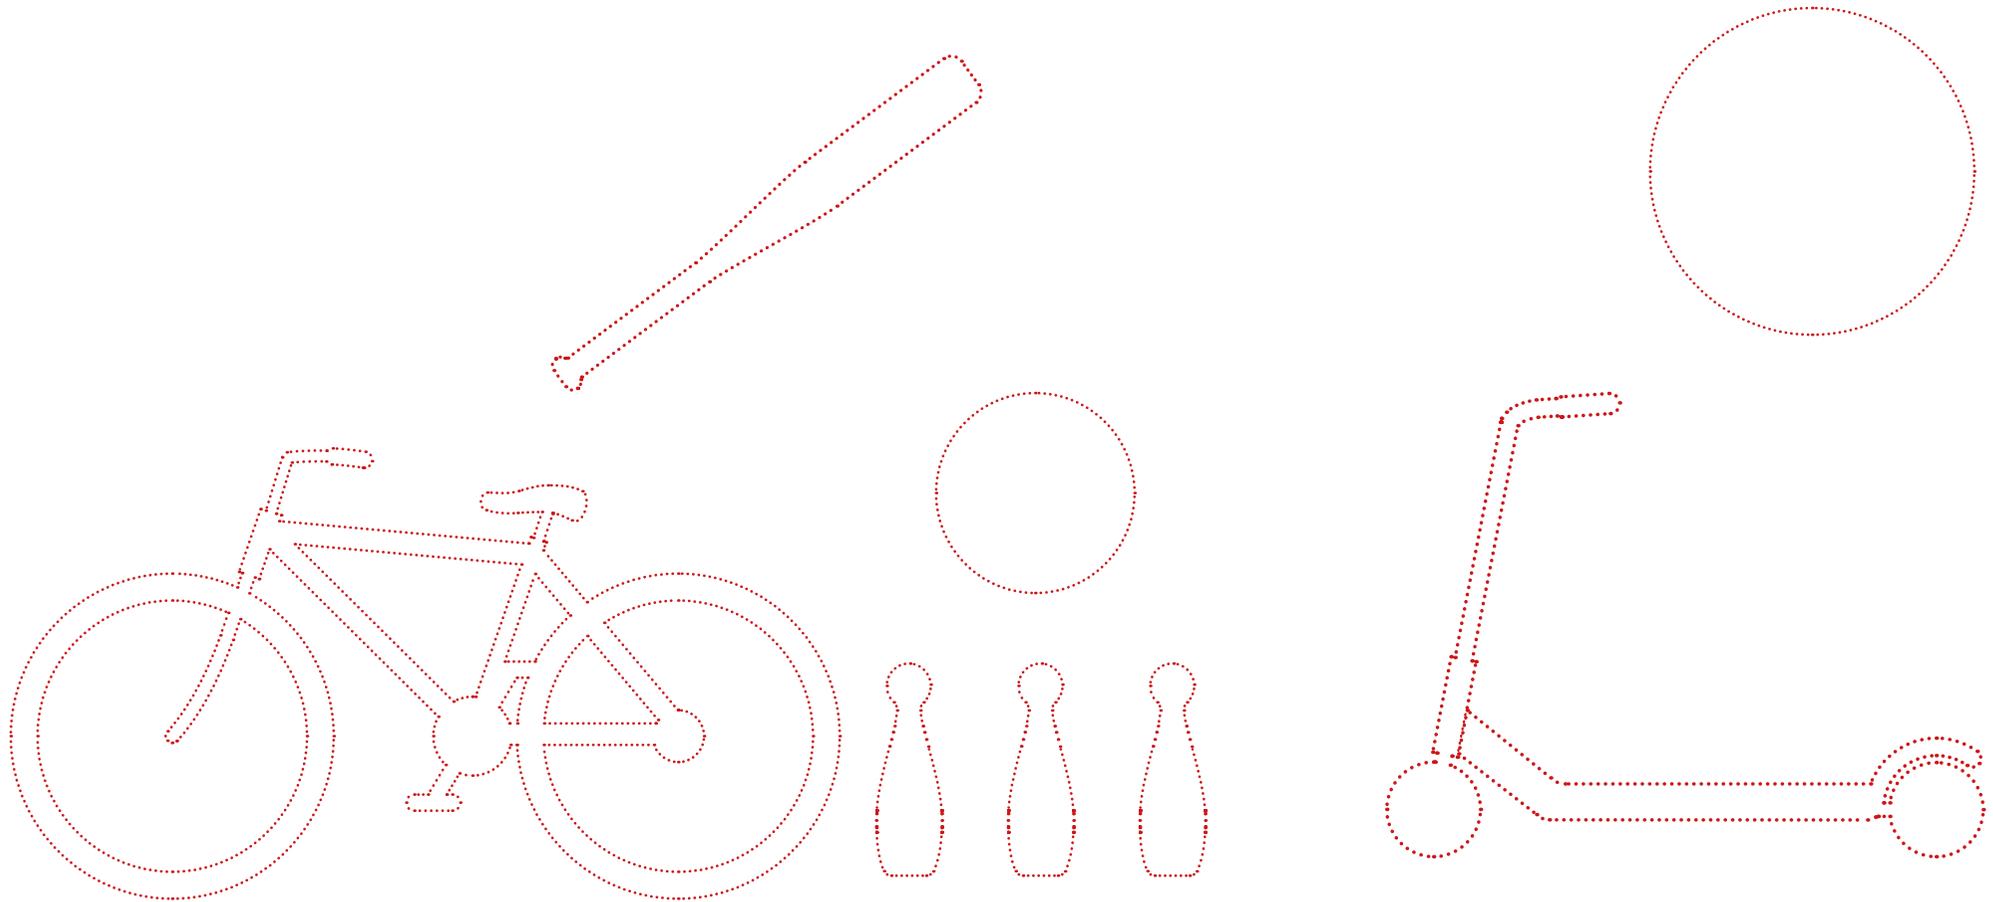

Design your Playground

Dunton Hills will have sports pitches and two playing fields; one for cricket and another for football. These fields can also be used to host larger community events.

What should we include in the sports pitches? Perhaps a clubhouse for indoor sports and for storing equipment? Bleachers and seating for parents and friends to watch games? Bathrooms and changing rooms? How can we make sure that the sports pitches are enjoyed by all members of the community? Maybe they could be used during off hours for different sports?
